1. The first part of the report deals with the general situation of the country and the progress of the work during the year. It is divided into two main sections: the first section deals with the general situation and the second section deals with the progress of the work.

2. The second part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work in the field of research and the second section deals with the results of the work in the field of education.

3. The third part of the report deals with the conclusions of the work during the year. It is divided into two main sections: the first section deals with the conclusions of the work in the field of research and the second section deals with the conclusions of the work in the field of education.

4. The fourth part of the report deals with the recommendations of the work during the year. It is divided into two main sections: the first section deals with the recommendations of the work in the field of research and the second section deals with the recommendations of the work in the field of education.

5. The fifth part of the report deals with the summary of the work during the year. It is divided into two main sections: the first section deals with the summary of the work in the field of research and the second section deals with the summary of the work in the field of education.

INTRODUCTION

CANSIM¹ (Canadian Socio-economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. The CANSIM Summary Reference Index is the first step in obtaining series from the CANSIM Main Base. This reference manual summarizes the data bank contents by subject and source publication and provides primary (Matrix) identification numbers which form the key to the second reference manual, the CANSIM Main Base Series Directory, which lists the entire 200,000 time series contained in CANSIM in matrix number order. A "matrix" in CANSIM contains a group of related time series and is equivalent to a "table" in a publication.

As shown in the "Guide to Effective Use of the CANSIM Main Base Series Directory" on Page iv, the Directory contains titles and descriptive detail for each matrix and its component series. There are two identifiers for each series on the CANSIM Main Base: the series number to the left of the series title combines with the matrix number to form the CANSIM Identification Number, while the number at the right is the Databank Identification Number. Either the CANSIM or Databank identifier may be used to retrieve a series from the CANSIM Main Base.

NOTE: The Summary Reference Index is published once per year. As data are added to the CANSIM Main Base, amendments are published. If you would like your name added to our mailing list in order to receive amendments or if you require further information, please contact CANSIM (613-995-7406), Statistics Canada, Ottawa, Ontario K1A 0Z8.

¹ "CANSIM is the registered Trade Mark for Statistics Canada's machine-readable data base. When publishing any data retrieved from CANSIM, the following must be used as the source:

'These data originate from CANSIM which is the registered Trade Mark for Statistics Canada's machine-readable data base'."

HOW TO USE CANSIM REFERENCE MANUALS

As noted in the Introduction, time series identification numbers are necessary for data retrieval and manipulation. In a few cases, these identifiers are provided in the Bank of Canada Review or in the Statistics Canada publication in which the series are released in printed form, as shown in the following extract from the Canadian Statistical Review.

Canadian Statistical Review (sample)

Databank Identification Numbers

If the publication does not list the required time series identification numbers, then they must be obtained from the CANSIM Main Base Series Directory. The "Guide to Effective Use of the CANSIM Main Base Series Directory" on Page iv illustrates the components of an entry in the Series Directory and explains the function of matrices, matrix headers, footnotes, CANSIM Identification Numbers, Databank Identification Numbers, etc. The CANSIM Main Base currently contains more than 200,000 time series, each of which is listed in this directory in matrix number order. The object, then, is to find the relevant matrix. This may be accomplished either by thumbing through the entire three volumes of the Main Base Series Directory or, more effectively, by referring to the Summary Reference Index.

The way in which the Summary Reference Index is to be used, will depend on the knowledge you bring to the search. If you know that Statistics Canada produces the series, you may also know the number of the catalogue in which the series is published. If so, refer to Appendix C of the Summary Reference Index which is a list of catalogue numbers of the Statistics Canada publications represented in CANSIM. If the publication is not listed, the required series is not available on CANSIM, and no further search of CANSIM documentation is necessary. If a publication is listed in Appendix C, this does not always mean that all data from that publication are available. Only a few summary series are available from some of the publications listed.

If the relevant publication is listed in Appendix C, or if you know that Statistics Canada produces the series but you do not know the number of the catalogue in which it is published, refer to the Table of Contents of the Summary Reference Index. While Appendix C provides information by catalogue number, the Table of Contents is organized by subject or area of interest. Read through the thirteen major subject areas listed and identify the one that is of interest to you. Each subject area is further divided into several subsections. Choose the subsection which seems most likely to include the data that you require. The subsection entitled "Canadian Statistical Review and Historical Summary" includes data from 150 catalogues pulled together and published in the Canadian Statistical Review; these publications are all listed separately in Appendix C.

Each entry in the Table of Contents includes the page number in the Summary Reference Index where the matrices available from the corresponding publication will be recorded. (Remember that a matrix roughly corresponds to a table in a publication). Matrices of seasonally-adjusted data are differentiated from those containing unadjusted data. Terminated matrices, that is, those for which updates have been discontinued, are indicated by an asterisk. Table numbers refer to the source publication.

If you want all available CANSIM data on a given subject, or in a given area of analysis, your first step is to refer to the Table of Contents of the Summary Reference Index and identify that subject or its closest counterpart among the categories provided. The remaining steps of the search procedure are the same as described above.

Matrix number*	000010	SERIES DIRECTORY AS OF OCTOBER XX, 19XX	MATRIX: 000010	First Matrix on this page
Source publication	ESTIMATED XXXX OF CANADA BY PROVINCE, QUARTERLY, THOUSANDS			Matrix Title
Matrix note	EST. XXXX OF CANADA BY PROV. (91-000), STC			SECURITY LEVELS
Agency and section responsible for this matrix. See inquiries List (Appendix A)	ESTIMATES FOR CALENDAR QUARTERLY PERIODS, FROM JAN. 1946. QUARTERLY DATA RELATE TO JAN. 1, APR. 1, JULY 1, AND OCT. 1 FOR ESTIMATED XXXX BY PROVINCE, AS OF JUNE 1 FOR YEARS 1946 ONWARDS, SEE MATRIX 39. DATA PUBLISHED APPROXIMATELY 75 CALENDAR DAYS AFTER END OF REFERENCE QUARTER.			PUBLIC series are those which are published or publishable. SECURE series are those which cannot be retrieved without the approval of the source
Series number *	1 CANADA 1.1 NEWFOUNDLAND 1.2 ALBERTA T1.10 QUEBEC	46-01-00 PART-SEC PUBLIC 53-07-00 SECURE 55-01-15 PUBLIC	D 123456 D 123457 D 123458 D 123459	PART-SEC series are those which contain PUBLIC and SECURE data
"T" before the series number indicates one which is no longer being updated				Databank Identification Number*
		Starting date of series in the base (year-month-day).	No data available when blank.	

* The CANSIM Identification Number (Matrix and series number), or the Databank Identification Number may be used to order series from CANSIM.

II SYSTEM OF NATIONAL ACCOUNTS(1)

A. National Income and Expenditure Accounts

1. National Income and Expenditure Accounts, Vol. I The Annual Estimates, 1926-1974 (13-531), English and French, Occasional - To be Published. These series represent a complete revision of the Canadian National Income and Expenditure Accounts. These new accounts incorporate major statistical revisions and changes in definitions and structural presentation; they represent an advance over the previous act of accounts and more closely follow to accepted international standards as defined by the United Nations System of National Accounts (Series F No. 2 Rev. 3, New York 1968).

C. Real Domestic Product

NOTE: Historical Continuity

On the 1971 base, a continuous record from 1971 of Real Domestic Product and the Index of Industrial Production and their components may be obtained from the following Statistics Canada publications:

Real Domestic Product by industry, (1971=100), (61-213), Annual

Indexes of Real Domestic Product by Industry, (61-005), Monthly

The same data are available in the following CANSIM matrices:

MATRIX

Real Domestic Product (including the Index of Industrial
Production)

Monthly	1122
Quarterly	1123
Annual	1124

For the period prior to 1971 the data are not available on a 1971 base. To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product and the Index of Industrial Production and the component indexes required for linking to the 1971 based series may be obtained from the following Statistics Canada publications:

Real Domestic Product by Industry, 1961 Base, (61-506),
Occasional - for Real Domestic Product for the period
from 1935 to 1960 and for the Index of Industrial Production
for the period from 1919 to 1960.

Indexes of Real Domestic Product by Industry, 1961-1969,
1961=100, (61-510), Occasional - for the period from 1961
to 1967 except for certain industries, RDP and other aggregates
listed in the annual supplement below.

Indexes of Real Domestic Product by Industry, (61-005),
Occasional release incorporating revisions - for the
period from 1968 to 1971 and for the period 1961 to
1967 for certain industries and aggregates.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

MATRIX

Real Domestic Product - Annual	383
- Quarterly	15
- Monthly	1421
Index of Industrial Production - Annual	384
- Monthly	16

III PRICES AND PRICE INDEXES(1)

REVISION BASED ON 1967 EXPENDITURES

Commencing with the May 1973 index, Canadian Consumer price indexes incorporate the latest in a series of periodic updatings which characterize their development since the early 1900's. A feature of the latest revision is the inclusion of updated weights to reflect 1967 family expenditure patterns (and within the food component, 1969 spending habits), replacing the 1957 weights used previously.

To maintain a continuous, long-term series, the revised index is linked to the previously published index for April 1973. Thus the published index up to and including April 1973 remains the official measure of consumer prices to that month, and subsequent price movements are measured by the revised index.

Full details of the latest weighting pattern and other background information on the revised Consumer Price Index, including a comparison of the movements of both the old and the revised series since 1967, are contained in a paper entitled The Consumer Price Index for Canada (1961=100), (Revision Based on 1967 Expenditures), (62-539), Occasional, Price \$0.75, available from the Publication Distribution Unit, Statistics Canada, Ottawa.

In keeping with the Statistics Canada policy of periodically updating indexes to more current periods, consumer price indexes were converted to a 1971=100 time reference base beginning with the month of August 1975. This replaced the base of 1961=100 which had been in effect since January 1969.

III PRICES AND PRICE INDEXES (continued)

C. Construction Price Statistics

Construction Price Statistics are compiled and presented in two publications. Construction Price Statistics, (62-007), Monthly, and Construction Price Statistics, (62-008) Quarterly. The monthly publication contains in summary form all the indexes presented in the quarterly publication. Each issue includes current data and historical and monthly data for periods ranging from five to ten years.

C. Job Vacancy Survey

The Quarterly Job Vacancies Survey presents job vacancy data series from the fourth quarter 1970 to the present. The survey covers all industrial sectors, except agriculture, fishing and trapping, domestic service and the non-civilian component of public administration and defence.

Vacancy Categories

Vacancies all categories (TV): vacancies for full-time, casual, part time, seasonal and temporary jobs.
Vacancies for full-time jobs (FT): vacancies for jobs with minimum duration of four full standard work weeks or full standard work month.

Longer-term Vacancies (LT): vacancies for full-time jobs, which have been unfilled for one month or more.

Occupation classification is based on the Canadian Classification and Dictionary of Occupations 1971 (CCDO).

Industrial classification is based on the 1960 Standard Industrial Classification.

Job vacancy rates: Job vacancy rates are obtained by expressing the number of vacancies per thousand existing jobs in all industries, except agriculture, fishing and trapping, domestic service and the non-civilian component of public administration and defence.

Three month moving averages centered on the specific month are calculated by progressively dropping the earliest month and adding the latest.

Reliability of estimates: Selection of publishable groups is based on the reliability of data, which in turn, is dependent on the size of the estimates. Where at least two-thirds of the estimates in a series are 500 or above, all the estimates in that series will be published including those below 500. Due to their lower reliability, users should treat estimates below 500 with appropriate caution. The per cent standard deviations for estimates below 500 are as follows:

ESTIMATE	PER CENT STANDARD DEVIATION
400	15.86
300	17.35
250	18.36
200	19.67
150	21.51
100	24.40
50	30.25

V MANUFACTURING AND PRIMARY INDUSTRIES(1)

A. General Review of the Manufacturing Industries of Canada, (31-203), Annual 1961-1971 (1960 SIC) Terminated, Canada only.

The concepts and definitions used are available upon request from Regional Statistics Section
Manufacturing & Primary Industries Division.

Manufacturing industry data available in CANSIM have been compiled as defined for the 1969
Census of Manufactures. Certain head offices which in the earlier years have classified at
the industry group level have over time been included with those head offices classified to indivi-
dual industries; beginning with 1970 all head offices are classified to individual industries.

Series starting with a "5" have been terminated and are combined for all years with the correspond-
ing industries in the series which begin with a "3". S.I.C. 107 is combined with S.I.C. 105.
S.I.C.'s 1011, 1012 and 1013 are combined into S.I.C. 101. S.I.C.'s 1391 and 1392 are combined
into S.I.C. 139. S.I.C. 3993 is combined with S.I.C. 3999.

The S.I.C. codes have been built into the series number in all cases.

MATRIX

Manufacturing establishment - number	3300
Male production and related workers - number	3301
Female production and related workers - number	3302
Manhours paid to production and related workers	3303
Wages paid to production and related workers	3304
Cost of fuel and electricity used	3305
Cost at plant of materials and supplies used	3306
Value of gross output, manufacturing activity	3307
Value of shipments of goods of own manufacture	3308
Value added, manufacturing activity	3309
Male administrative, office and other non-manufacturing employees - number	3310
Female administrative, office and other non-manufacturing employees - number	3311
Salaries paid to administrative, office and other non-manufacturing employees	3312
Total employees - number	3313
Salaries and Wages paid to total employees	3314
Total cost of materials, supplies and goods purchased for resale	3315
Value of gross output, total activity	3316
Total value of shipments and other revenue	3317
Value added, total activity	3318

H. Quebec Manufacturing Industries

SECTION (A) Principal statistics of the manufacturing industries in Quebec,
by administrative region and major industrial group, annual data
since 1961

NOTE: Regionalization of the principal statistics has been done at the QBS from
the Census of Manufactures tapes provided by Statistics Canada. Total
activity statistics never include headquarters' activity.

MATRIX

1. Number of manufacturing establishments	4175
2. Number of production workers	4176
3. Production wages	4177
4. Cost of fuel and electricity	4178
5. Cost of materials and supplies used	4179
6. Value of shipments of products of own manufacture	4180
7. Value of production of own manufacture	4181
8. Manufacturing value added	4182
9. Number of production workers and administration employees	4183
10. Wages and salaries of production workers and administration employees	4184
11. Cost of materials, supplies and goods for resale	4185
12. Value of shipments and other receipts	4186
13. Value of production and other receipts	4187
14. Total value added	4188

V MANUFACTURING AND PRIMARY INDUSTRIES (concluded)

SECTION (B) Principal statistics of the manufacturing industries in Quebec, by major industrial group and sub-group, for Quebec as a whole, annual data since 1961

NOTE: The classification used for these matrixes is the revised Standard Industrial Classification Manual of 1970. In order to obtain consistent chronological series from 1961 to 1972, some sub-groups have been aggregated to form a total of 157 industrial sub-groups. SIC codes have been integrated to series number in all cases. Basic data were taken from the Census of Manufactures tapes provided by Statistics Canada.

	MATRIX
1. Number of manufacturing establishments	4194
2. Number of production workers	4195
3. Production wages	4196
4. Cost of fuel and electricity	4197
5. Cost of materials and supplies used	4198
6. Value of shipments of products of own manufacture	4199
7. Value of production of own manufacture	4200
8. Manufacturing value added	4201
9. Number of production workers and administration employees	4202
10. Wages and salaries of production workers and administration employees	4203
11. Cost of materials, supplies and goods for resale	4204
12. Value of shipments and other receipts	4205
13. Value of production and other receipts	4206
14. Total value added	4207

VI CAPITAL AND FINANCE(1)

A. Industrial Corporations, Financial Statistics , (61-003), Quarterly

The historical quarterly financial statistics for Industrial Corporations from 1962-69 inclusive were published in June 1970. Subsequent quarterly publications are available for the years 1970 and 1971 including data in the same format as that in the 1962-1969 historical publication.

In the first quarter 1972 a comprehensive revision of the quarterly survey questionnaire was made. This resulted in revisions to the table formats included in the quarterly publication. The CANSIM matrices for 1st quarter 1962 to 1st quarter 1972 have been terminated, and new matrices and series established as of first quarter 1970. Data for 1970 and 1971 are revised and rearranged in the new matrices and series. The rearrangement from the old series to the new series is based on the linkage tables printed in the regular 1973 quarterly publications.

MATRICES FOR 1962-1971

Quarterly Statements of Estimated Assets, Liabilities and Shareholders Equity Unadjusted for Seasonality. (Matrix Nos. Listed under A)

Quarterly Statements of Estimated Revenue, Expenses and Retained Earnings Unadjusted for Seasonality. (Matrix Nos. Listed under B)

Seasonally Adjusted Selected Balance Sheet and Revenue and Expense Items in Millions of Dollars on a quarterly basis. (Matrix Nos. Listed under C)

Quarterly Financial Position and Cash Flow. (Matrix Nos. Listed under D)

Quarterly Balance Sheet and Income Statement Ratios and Percentages. (Matrix Nos. Listed under E)

VII CONSTRUCTION(1)

A. National Wealth And Capital Stocks

STOCKS AND FLOWS OF FIXED NON-RESIDENTIAL CAPITAL IN CANADA.

1. 1960 SIC

The series given here represent annual estimates of the stocks and flows of fixed non-residential capital in Canada beginning with the year 1926.

The perpetual inventory method which underlies the present estimates starts with annual investment expenditures and estimates of the service lives of the assets. The capital stock estimates for a given year are obtained by accumulating past investment expenditures and adjusting them for the value of investment that has been used up (gross stocks) or adjusting them for the gradual wear and tear and the obsolescence they undergo during the time they are used (net stocks). A comprehensive description of the perpetual inventory method is given in Fixed Capital Flows and Stocks - Manufacturing - Canada 1926-1960: Methodology (13-522), Occasional.

The series are given by major industries according to the 1960 S.I.C., both in constant (1961) and current dollar valuation covering the following detailed types of components:

1. Building Construction
2. Engineering Construction
3. Machinery and Equipment
4. Capital Items Charged to Operating Expenses
5. Total Components

The component series are presented for the following categories of data:

	Current Dollar Valuation	Constant Dollar 1961 Valuation
1. Gross Fixed Capital Formation (GFCF)	Yes	Yes
2. Net Fixed Capital Formation (NFCF)	"	"
3. Capital Consumption Allowances (CCA)	"	"
4. Mid-year Gross Stock (MYGS)	"	"
5. Mid-year Net Stock (MYNS)	"	"
6. End Year Gross Stock (EYGS)	No	"
7. End Year Net Stock (EYNS)	No	"
8. Discards	No	"

NOTE:

The mnemonics appearing at the end of the series title of some 650 series in the Capital Stocks data block, serve to identify the component series of the CANDIDE model which is an undertaking of the Economic Council of Canada.

VII CONSTRUCTION (continued)

B. Capacity Utilization Rates In Canadian Manufacturing

The capacity utilization rates are given by major group according to the 1970 Standard Industrial Classification, for a period going back to 1961.

The definition of capacity in this procedure is the maximum output obtainable under normal technological and market conditions.

The methodology used to produce these indexes is based on a comparison of the actual output of an industry during a certain time period with the estimated capacity output during that period.

The estimated capacity output is based on a capacity capital-output ratio derived from the industry's gross stock of fixed capital, measured in 1971 dollars. These capital stock estimates are produced by the National Wealth and Capital Stock Section of Statistics Canada.

For concepts and detailed methodology please refer to Utilization Rates in Canadian Manufacturing, (31-003), Quarterly.

These indexes are available for the following list of industry levels:

1. Food and Beverages
2. Tobacco
3. Rubber and Plastics Products Industries
4. Leather
5. Textile
6. Knitting Mills
7. Clothing
8. Wood
9. Furniture and Fixtures
10. Paper and Allied Industries
11. Printing, Publishing and Allied Industries
12. Primary Metals
13. Metal Fabricating
14. Machinery
15. Transportation Equipment
16. Electrical Products
17. Non-metallic Minerals
18. Petroleum and Coal Products
19. Chemical and Chemical Products
20. Miscellaneous Manufacturing
21. Durable Manufacturing Industries
22. Non-Durable Manufacturing Industries
23. Total Manufacturing

VII CONSTRUCTION (continued)

C. Capital And Repair Expenditures On Construction

Source: Construction in Canada, (64-201), Annual. This series (1952-1974) provides annual estimates of capital and repair expenditures on construction, broken down by some 70 different structure types, crossclassified by province and sector. Included are final, preliminary, and forecast data.

For the most part the data are based on the Statistics Canada surveys of Capital Expenditures. From the same source, another publication Private and Public Investment, (61-205), Annual, reports the total capital and repair expenditure program, including outlays on machinery and equipment.

Total Value of Construction Work Performed, Annual, in Thousands of Dollars

A - Actual Data from 1952-1974 and also preliminary data for 1975 and forecast data for 1976

P - Preliminary Data: Tables 9 to 17 from 1967-1975, Tables 18 to 27 from 1956-1975

F - Forecast Data: Tables 9 to 17 from 1967-1976, Tables 18 to 27 from 1956-1976

VII CONSTRUCTION (continued)

D. Private and Public Investment in Canada, Outlook (61-205), Annual

The series given here represent estimates of actual capital expenditures beginning with the year 1956. These annual estimates of capital and repair expenditures on construction and machinery and equipment are cross-classified by province and sector, together with national totals.

The data are obtained from the publication Private and Public Investment in Canada, Outlook (61-205), annual, where one also can find a brief description of the methods and concepts employed in obtaining the estimates from the Capital Expenditure Survey.

VIII MERCHANDISING & SERVICES (concluded)

B. Computer Service Industry, (63-222), Annual

Data are presented for companies primarily engaged in the computer services industry as well as for companies and institutions engaged in providing computer services to the public as a secondary activity. 1972 and 1973 data are comparable. In 1974 computer service companies were classified into two groups consisting of establishments primarily engaged in providing computer services and of establishments primarily engaged in sales and leasing or rental of ADP hardware.

The concepts and definitions used are available upon request from Merchandising and Services Division.

IX EXTERNAL TRADE(1)

A. Summary of External Trade, (65-001), Monthly

NOTE: For historical series prior to 1968, refer to matrices 11, 12, 21, 22, 203 and 204 in Page 1.3. The matrices in this section generally contain historical data back to 1968 and are sub-divided into four types as follows:

1. COUNTRY

These three matrices contain series for individual countries, geographic regions and selected groups of countries. Data points are monthly raw figures in thousands of dollars.

MATRIX

Imports from individual countries	3652
Total Exports to individual countries	3686
Domestic Exports to individual countries	3687

2. COMMODITY

The time series within each of these matrices are the commodity Categories covered in tables M-3 or X-3 of the Summary of External Trade, (65-001), Monthly, with various sub-total series including those published in the Canadian Statistical Review. Data points are monthly raw figures in thousands of dollars.

MATRIX

A. Population Projections for Canada and the Provinces, 1972-2001,
(91-514), Occasional

These are Statistics Canada first official series of population projections for Canada and the provinces. They are generated by the Statistics Canada Population Projection Model (SCPM) using different hypotheses regarding future trends in fertility, mortality, immigration, emigration and inter-provincial migration. More information about the general methodology and assumptions is given in Population Projections for Canada and the Provinces, 1972-2001, (91-514), Occasional.

These series will be revised after the 1976 census.

Description of the model and projections algorithm is presented in Technical Report on Population Projections for Canada and the Provinces, 1972-2001
(91-516), Occasional

MATRIX

Canada	3987
Newfoundland	3988
Prince Edward Island	3989
Nova Scotia	3990
New Brunswick	3991
Quebec	3992

STATISTICS CANADA PUBLICATIONS REPRESENTED IN CANSIM

Following is a list of Statistics Canada Publications which contain data also disseminated by CANSIM. Not all data appearing in a Publication will necessarily be available in CANSIM. Also, the data available in The Canadian Statistical Review, (11-003), Monthly, is assembled from a number of other Statistics Canada publications. They are included separately on this list.

<u>CAT. NO.</u>	<u>PAGE NO.</u>	<u>TITLE</u>
11-003	1	Canadian Statistical Review
11-505	1	Canadian Statistical Review - Historical Summary
13-001	4	National Income & Expenditure Accounts. System of National Accounts
13-002	7	Financial Flow Accounts. System of National Accounts
13-201	4	System of National Accounts - National Income & Expenditure Accounts
13-522	28	Fixed Capital Flows and Stocks, Manufacturing, Canada, 1926-1960

II SYSTEM OF NATIONAL ACCOUNTS (continued)

C. Real Domestic Product

NOTE: Historical Continuity

On the 1971 base, a continuous record from 1971 of Real Domestic Product and the Index of Industrial Production and their components may be obtained from the following Statistics Canada publication: corresponding data in constant prices are also available plus some data in current and constant prices for selected manufacturing industries.

Real Domestic Product by industry, (1971=100), (61-213), Annual

Indexes of Real Domestic Product by Industry, (61-005), Monthly

The same data are available in the following CANSIM matrices:

MATRIX

Real Domestic Product (including the Index of Industrial Production)

Monthly	1122
Quarterly	1123
Annual - Index	1124
- Constant dollars	385
- Manufacturing industries - constant and current dollars	386
- Manufacturing industries - indexes	387
- Manufacturing industries - Implicit price indexes	388

For the period prior to 1971 the data are not available on a 1971 base. To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product and the Index of Industrial Production and the component indexes required for linking to the 1971 based series may be obtained from the following Statistics Canada publications:

Real Domestic Product by Industry, 1961 Base, (61-506), Occasional - for Real Domestic Product for the period from 1935 to 1960 and for the Index of Industrial Production for the period from 1919 to 1960.

Real Domestic Product by Industry, 1961-1971 (1961=100), (61-516), Occasional - Revised estimates of Real Domestic Product (RDP) by industry for the 1961-1971 period on an annual and sub-annual basis as well as showing some previously unpublished data for the service-producing industries.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

III PRICES AND PRICE INDEXES(1)

REVISION BASED ON 1967 EXPENDITURES

Commencing with the May 1973 index, Canadian Consumer price indexes incorporate the latest in a series of periodic updatings which characterize their development since the early 1900's. A feature of the latest revision is the inclusion of updated weights to reflect 1967 family expenditure patterns (and within the food component, 1969 spending habits), replacing the 1957 weights used previously.

To maintain a continuous, long-term series, the revised index is linked to the previously published index for April 1973. Thus the published index up to and including April 1973 remains the official measure of consumer prices to that month, and subsequent price movements are measured by the revised index.

Full details of the latest weighting pattern and other background information on the revised Consumer Price Index, including a comparison of the movements of both the old and the revised series since 1967, are contained in a paper entitled The Consumer Price Index for Canada (1961=100), (Revision Based on 1967 Expenditures), (62-539), Occasional, Price \$0.75, available from the Publication Distribution Unit, Statistics Canada, Ottawa.

In keeping with the Statistics Canada policy of periodically updating indexes to more current periods, consumer price indexes were converted to a 1971=100 time reference base beginning with the month of August 1975. This replaced the base of 1961=100 which had been in effect since January 1969.

III PRICES AND PRICE INDEXES (continued)

C. Construction Price Statistics

Construction Price Statistics are compiled and presented in two publications. Construction Price Statistics, (62-007), Monthly, and Construction Price Statistics, (62-008) Quarterly. The monthly publication contains in summary form all the indexes presented in the quarterly publication. Each issue includes current data and historical and monthly data for periods ranging from five to ten years.

V MANUFACTURING AND PRIMARY INDUSTRIES (concluded)

SECTION (B) Principal statistics of the manufacturing industries in Quebec, by major industrial group and sub-group, for Quebec as a whole, annual data since 1961

NOTE: The classification used for these matrices is the revised Standard Industrial Classification Manual of 1970. In order to obtain consistent chronological series from 1961 to 1972, some sub-groups have been aggregated to form a total of 157 industrial sub-groups. SIC codes have been integrated to series number in all cases. Basic data were taken from the Census of Manufactures tapes provided by Statistics Canada.

MATRIX

1. Number of manufacturing establishments	4194*
2. Number of production workers	4195*
3. Production wages	4196*
4. Cost of fuel and electricity	4197*
5. Cost of materials and supplies used	4198*
6. Value of shipments of products of own manufacture	4199*
7. Value of production of own manufacture	4200*
8. Manufacturing value added	4201*
9. Number of production workers and administration employees	4202*
10. Wages and salaries of production workers and administration employees	4203*
11. Cost of materials, supplies and goods for resale	4204*
12. Value of shipments and other receipts	4205*
13. Value of production and other receipts	4206*
14. Total value added	4207*

* Terminated Matrix

VII CONSTRUCTION (continued)

C. Capital And Repair Expenditures On Construction

Source: Construction in Canada, (64-201), Annual. This series (1952-1974) provides annual estimates of capital and repair expenditures on construction, broken down by some 70 different structure types, crossclassified by province and sector. Included are final, preliminary, and forecast data.

For the most part the data are based on the Statistics Canada surveys of Capital Expenditures. From the same source, another publication Private and Public Investment, (61-205), Annual, reports the total capital and repair expenditure program, including outlays on machinery and equipment.

Total Value of Construction Work Performed, Annual, in Thousands of Dollars

A - Actual Data from 1952-1975 and also preliminary data for 1976 and forecast data for 1977

P - Preliminary Data: Tables 9 to 17 from 1967-1976, Tables 18 to 27 from 1956-1976

F - Forecast Data: Tables 9 to 17 from 1967-1977, Tables 18 to 27 from 1956-1977

VII CONSTRUCTION (continued)

D. I Private and Public Investment in Canada, Outlook (61-205), Annual

The matrices listed below contain series representing Actual, Preliminary Actual and Forecast data for Capital and Repair Expenditures. For Mid-Year Forecasts see Private and Public Investment in Canada, Mid-Year Review (61-206), Annual. The Actual matrices begin in 1956, the Preliminary Actual and Forecast begin in 1973. The last two years in Actual matrices are current Preliminary Actual and Forecast.

The matrices for the provinces and territories also include data split between the private and public categories for Actuals beginning in 1963, Preliminary Actuals in 1976 and Forecasts in 1977.

For definitions and a brief description of the methods used to collect these data see Section V, Statistical Notes in Private and Public Investment, Outlook, (61-205), Annual.

CAUTION: Do not retrieve the Canada data using the FROM-TO MATRIX NUMBER option because there are matrices which are on the base but not yet released, and do not use Databank Number Range option without verifying the numbers in the Series Directory.

D. II Private and Public Investment in Canada, Mid-Year Review (61-206), Annual

The matrices listed below contain series representing mid-year forecasts of capital expenditures. Repairs are not included since these data are not revised on our mid-year survey.

For information concerning our Actual, Preliminary Actual and Forecast data on CANSIM see Private and Public Investment in Canada, Outlook (61-205), Annual.

The Canada matrices begin in 1956 with the following exceptions Mining (1192) - 1963, Government departments (1220) - 1968, Private and Public (1224) - 1968, Public (1228) - 1968.

The Provinces and Territories can be retrieved from 1968 (the first year these breakdowns were compiled). Beginning in 1977 these matrices also include data, split between the private and public categories.

For definitions and a brief description of the methods used to collect these data see Section V, Statistical Notes in the publication.

IX EXTERNAL TRADE(1)

A. Summary of External Trade, (65-001), Monthly

NOTE: For historical series prior to 1968, refer to matrices 11, 12, 21, 22, 203 and 204 in Page 1.3. The matrices in this section generally contain historical data back to 1968 and are sub-divided into four types as follows:

1. COUNTRY

These three matrices contain series for individual countries, geographic regions and selected groups of countries. Data points are monthly raw figures in thousands of dollars.

MATRIX

Imports from individual countries	3652
Total Exports to individual countries	3686
Domestic Exports to individual countries	3687

2. COMMODITY

The time series within each of these matrices are the commodity Categories covered in tables M-3 or X-3 of the Summary of External Trade, (65-001), Monthly, with various sub-total series including those published in the Canadian Statistical Review. Data points are monthly raw figures in thousands of dollars.

4. TRADE MEASURES

A. Import and Export Price and Volume Indexes

The 1971=100 trade price and volume indexes for the period 1968 to date are allocated to matrices as follows:

	MATRIX	
	IMPORTS	EXPORTS
Paasche (current weighted) price indexes, 1971=100	3680	3715
Laspeyres (fixed weighted) price indexes, 1971=100	3681	3716
Laspeyres (fixed weighted) price indexes, 1971=100		
Unadjusted and seasonally adjusted	3682	3717

B. Monthly trade values, by principal trading areas and by
Section of the Import and Export Commodity

Classification, unadjusted and Seasonally adjusted	3679	3714
--	------	------

A. CropsGrain Trade of Canada, (22-201) ANNUAL

TABLE

MATRIX

EXPORT CLEARANCE OF SPECIFIED CANADIAN GRAIN BY COUNTRIES OF FINAL
DESTINATION, BY CROP YEARS IN BUSHEL

72. Wheat and Customs Exports of Wheat Flour (Wheat Equivalent)	936
75. Oats and Customs Exports of Oatmeal and Rolled Oats, (Oats Equivalent)	937
76. Barley and Customs Exports of Malt (Barley Equivalent)	938
77. Rye	939
78. Flaxseed	940
79. Rapeseed and Customs Exports to United States	941

SUPPLY AND DISPOSITION BALANCE TABLE, CANADA, BY CROP YEARS BEGINNING
1933-34 IN BUSHEL

88. Wheat	942
88. Oats	943
88. Barley	944
88. Rye	945
88. Flaxseed	946
88. Rapeseed	947
88. Corn	948

Producers' Marketings of Western Canadian Grains, by Crop Years beginning 1908-09, in Thousands of Bushels	949
---	-----

Rail Shipments of Western Canadian Grains from Western Country Elevators by Crop Years beginning 1940-41, in Thousands of Bushels	950
--	-----

92. Annual Carryover (Bushels) of Canadian Grains in Canada and the U.S.A. at July 31, beginning in 1925 for Wheat, Oats, Barley, Rye and Flaxseed in 1958 for Rapessed	970
---	-----

CANADIAN WHEAT BOARD PRICES TO PRODUCERS FOR:

64. Western Canadian Wheat, Basis in Store Thunder Bay or Vancouver beginning Crop Year 1943-44 for Feed Wheat and One Amber Durum (Dollars Per Bushel)	971
65. Western Canadian Oats, Basis in Store Thunder Bay beginning Crop Year 1949-50 for the following Grades, two C.W. and One Feed (Dollars Per Bushel)	972
66. Western Barley, Basis in Store Thunder Bay beginning Crop Year 1949-50 for the following Grades, Two C.W. Six-Row, Two C.W. Two-Row and One Feed (Dollars Per Bushel)	973

Shipments of Western Grains and Feeds, Under Feed Grain Assistance Regulations by Province of Destination, in Tons, beginning in the Crop Year 1941-42	974
--	-----

C. Real Domestic Product

NOTE: Historical Continuity

On the 1971 base, a continuous record from 1971 of Real Domestic Product and the Index of Industrial Production and their components may be obtained from the following Statistics Canada publication: corresponding data in constant prices are also available plus some data in current and constant prices for selected manufacturing industries.

Real Domestic Product by industry, (1971=100), (61-213), Annual

Indexes of Real Domestic Product by Industry, (61-005), Monthly

The same data are available in the following CANSIM matrices:

MATRIX

Real Domestic Product (including the Index of Industrial Production)

Monthly	1122
Quarterly	1123
Annual - Index	1124
- Constant dollars	385
- Manufacturing industries - constant and current dollars	386
- Manufacturing industries - indexes	387
- Manufacturing industries - Implicit price indexes	388

For the period prior to 1971, selected annual data are available on a 1971 base. The data are available in the following CANSIM matrix:

MATRIX

Annual Historical Indexes of Real Domestic Product by Industry, 1971=100	389
--	-----

To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product and the Index of Industrial Production and the component indexes required for linking to the 1971 based series may be obtained from the following Statistics Canada publications:

Real Domestic Product by Industry, 1961 Base, (61-506), Occasional - for Real Domestic Product for the period from 1935 to 1960 and for the Index of Industrial Production for the period from 1919 to 1960.

Real Domestic Product by Industry, 1961-1971 (1961=100), (61-516), Occasional - Revised estimates of Real Domestic Product (RDP) by industry for the 1961-1971 period on an annual and sub-annual basis as well as showing some previously unpublished data for the service-producing industries.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

MATRIX

Real Domestic Product - Annual	383*
- Quarterly	15*
- Monthly	1421*
Index of Industrial Production - Annual	384*

V MANUFACTURING AND PRIMARY INDUSTRIES(1)

A. General Review of the Manufacturing Industries of Canada, (31-203), Annual 1961-1971 (1960 SIC) Terminated, Canada only.

The concepts and definitions used are available upon request from Regional Statistics Section
Manufacturing & Primary Industries Division.

Manufacturing industry data available in CANSIM have been compiled as defined for the 1969
Census of Manufactures. Certain head offices which in the earlier years have classified at
the industry group level have over time been included with those head offices classified to indivi-
dual industries; beginning with 1970 all head offices are classified to individual industries.

Series starting with a "5" have been terminated and are combined for all years with the correspond-
ing industries in the series which begin with a "3". S.I.C. 107 is combined with S.I.C. 105.
S.I.C.'s 1011, 1012 and 1013 are combined into S.I.C. 101. S.I.C.'s 1391 and 1392 are combined
into S.I.C. 139. S.I.C. 3993 is combined with S.I.C. 3999.

The S.I.C. codes have been built into the series number in all cases.

MATRIX

Manufacturing establishment - number	3300

(2) New matrix - Figures available from 1964 on.

XI AGRICULTURE AND FOOD (continued)

B. Livestock And Animal Products

Production of Poultry and Eggs, (23-202), Annual

MATRIX

1. Supply and Disposition of Poultry by Year Showing: Stocks at January 1, Production, Imports Exports, Stocks at December 31, Total, and Total Domestic Disappearance	1136
2. Eggs: Supply and Disposition Showing: Stocks at January 1, Production, Imports, Exports Stocks at December 31, Used for Hatching, Total and Total Domestic Disappearance	1137

PRODUCTION, DISPOSITION AND FARM VALUE BY PROVINCE:

4. Total Poultry Meat	1138
5. Fowl and Chicken Meat	1139
6. Fowl and Chicken Meat Shown Separately by Province from 1963	1140
7. Turkey Meat	1141
8. Goose Meat	1142
9. Duck Meat	1143
10. Eggs	1144
11. Eggs: Production by Month from 1951	1145
12. Eggs: Disposition, by Province by Month from 1951	1146
15. Poultry: Number on Farms by Province at June 1 from 1941	1147
16. Poultry: Number on Farms by Province at December 1 from 1941	1148

XII POPULATION(1)

A. Population Projections for Canada and the Provinces, 1972-2001, (91-514), Occasional

These are Statistics Canada first official series of population projections for Canada and the provinces. They are generated by the Statistics Canada Population Projection Model (SCPM) using different hypotheses regarding future trends in fertility, mortality, immigration, emigration and inter-provincial migration. More information about the general methodology and assumptions is given in Population Projections for Canada and the Provinces, 1972-2001, (91-514), Occasional.

These series will be revised after the 1976 census.

Description of the model and projections algorithm is presented in Technical Report on Population Projections for Canada and the Provinces, 1972-2001 (91-516), Occasional

MATRIX

Canada	3987
Newfoundland	3988
Prince Edward Island	3989
Nova Scotia	3990
New Brunswick	3991
Quebec	3992
Ontario	3993
Manitoba	3994
Saskatchewan	3995
Alberta	3996
British Columbia	3997
Yukon	3998
North West Territories	3999

NOTE: The series identifiers beginning with 2, 4, 6, and 8 are for the years 2000 and 2001. The simplest way to retrieve these series is to code "*" (asterisks) for both start date and end date.

XII POPULATION (continued)

B. POPULATION, CENSUS DIVISIONS & SUBDIVISIONS (historical)

The series comprises two tables. The first gives the population of the provinces and the territories back to 1901 Census as well as decennial increases. The second gives, for each Census taken since 1921, the population of the provinces, counties, census divisions, cities, towns, villages, municipalities and census subdivisions.

For a comprehensive description of boundary definitions pertinent to the census geographic areas tabulated refer to the source publications 1971 Census Catalogue 92-702 and 1976 Census Catalogues 92-802, 92-803, 92-804, 92-805.
